

INDEPENDENT PROGRAMME ASSURANCE

Do you have confidence that your project status reports tell the real story?

Are you assured that what you have been promised will be delivered?

What price peace of mind?

Clients should consider engaging an independent, non-project aligned delivery specialist with proven experience to provide an ongoing assessment of their programme, focussing on the recommendations to achieve the planned business benefits.

A regular external review by a specialist with no vested interest in the delivery can provide the programme sponsor and steering board with a level of confidence that the project is being delivered according to the requirements of time, budget and quality. This concept can be used by any clients to provide themselves with ongoing peace-of-mind, as part of the agreed programme governance.

Our core differentiator is the commitment that LOC will not engage in any market-making activity, ensuring any advice offered is not encumbered by the underlying need to sell our services. It is fundamental that the review is seen as totally independent and the reviewer treated by the board as a programme Non Executive.

LOC provides the following...

Project Assurance

An ongoing assessment focussing on the baselined plan and benefits case to ensure the project remains on schedule from a time, cost and quality perspective and providing recommendations to the project management and the steering board as well as giving the core sponsors and increased level of delivery assurance.

Call-off Delivery Services

LOC offers specialist delivery services that a programme or project can call upon to action specific schedules-of-work or skills, i.e. Business Analysis, where the client, project or existing suppliers do not have the capability and the client prefers to use LOC via a call-off arrangement.
