

PROGRAMME HEALTHCHECK

Are you confident your programme is going to deliver?

Are you on track to deliver the agreed benefits?

Don't leave it to chance

Complex programmes require careful and skilled management to ensure delivery within the given time and resource constraints. An independent review of progress will give you the peace of mind that your programme is still on track to achieve the anticipated benefits agreed with the business.

During a Programme Healthcheck, LOC specialists examine the objectives, scope, approach, and management of the programme as well as the quality of resources and project governance.

The Fundamentals of Programme success are straightforward, but they tend to get lost amid the complexity surrounding change programmes. Underpinning the fundamentals is the requirement to fully understand the business needs as well as the relevance of the programme.

LOC works with you so that you can be confident that the business benefits will be realised.

LOC provides the following...

Programme Healthcheck

In cooperation with key programme stakeholders, LOC specialists review all aspects of the delivery with the view to identifying the strongest and weakest aspects as well as any recommendations to ensure ongoing delivery.

Healthcheck Report

The assignment output is a report that sets out:

- What is working well and the positive aspects of the programme;
- What is not working well and why;
- A set of actions that will remedy the identified shortfalls in the programme;

Armed with this information you will be able to make informed decisions about what is best for the programme and, ultimately, your business.
